

Key Benefits of MicroEssentials®

Uniform Nutrient Distribution

Every patented MicroEssentials granule has the same analysis, so you can be confident every plant will get balanced nutrition. It eliminates nutrient segregation common with traditional blends.

Improved Nutrient Uptake

The innovative chemistry of each granule combines nutrients that are proven to interact and improve phosphorus uptake.

Every MicroEssentials granule contains nitrogen, phosphorus, sulfur and zinc. This ensures uniform distribution and better nutrient uptake.

Season-long Sulfur Availability

MicroEssentials combines two forms of sulfur, both sulfate and elemental sulfur, in every granule to ensure sulfur availability throughout the growing season.

THE NEXT GENERATION OF FERTILIZER

Innovation by The Mosaic Company

MicroEssentials® fertilizer is a premium product from The Mosaic Company, one of the world's leading producers and marketers of concentrated phosphate and potash crop nutrients. To learn more about MicroEssentials products, go to

MicroEssentials®... The Next Generation of Fertilizer

With every generation, the world continues to grow. This means we need more food. Today's farmers are leading the way by using innovative solutions like MicroEssentials fertilizer to meet the increasing food demands of the future.

MicroEssentials is the next generation of fertilizer, designed to meet the needs of your advanced farming operation.

Demand more; demand MicroEssentials.

MicroEssentials®

Balanced Crop Nutrition Through Patented Fusion™ Technology

MicroEssentials® SZ™ (12-40-0-10S-1Zn) is a proprietary fertilizer specially formulated for use on most crops. Through our patented Fusion™ technology process, nitrogen, phosphorus, sulfur and zinc are fused into one nutritionally balanced granule, creating a single source for balanced crop nutrition. MicroEssentials fertilizers' unique chemistry promotes nutrient interactions that improve phosphorus uptake in diverse soil conditions common early in the growing season.

Maximized Yields, Increased Profitability

By using MicroEssentials products, you can achieve a better return on investment. Providing the right ratios of nutrients at the right time, MicroEssentials fertilizer enables uniform nutrient distribution, increased phosphorus uptake and season-long sulfur availability across the field, which results in gained efficiencies, maximized yields and increased profitability for your advanced crop production operations.
